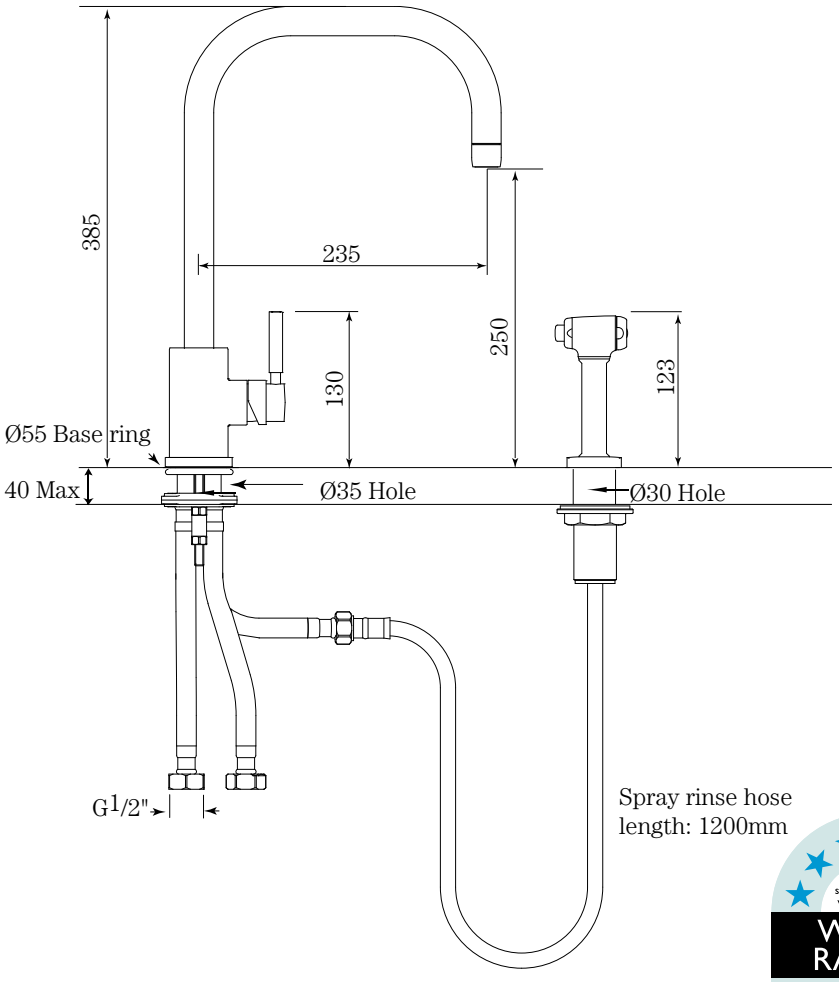
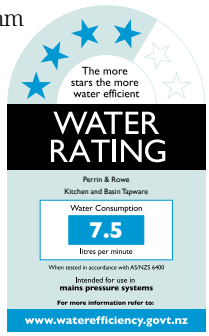
CERTIFICATIONS:
WELS Rating 4 Star 7.5L/min

DIMENSIONS:

BEFORE YOU ORDER THIS MODEL:
This model does not suit incoming water pressure lower than 100kPa or higher than 500kPa. This model requires a minimum inlet water pressure of 100kPa to ensure complete diversion from the tap to the spray rinse. The chrome stop cocks supplied with this tap contain gauze filters. Please ensure your plumber is advised of minimum & maximum water pressure and to install the stop cocks as not doing so invalidates the tap warranty.
Call 09 309 3023 for assistance.





All dimensions in millimetres unless otherwise stated.
