All Pressure™ No Compromise.

Introducing the game-changing
All Pressure™ Vitreous Enamel range.

Like for like replacement for existing
low pressure cylinders

One Cylinder to Rule them All

New Zealand is one of the few countries where low pressure hot water systems are still common, and because upgrading to mains pressure can be costly, many homeowners simply replace their existing unit with another low pressure cylinder.

After speaking with both homeowners and plumbers, the local Rheem design team set out to solve this challenge. The result is Rheem All Pressure™ VE (APVE™) – a smarter, future-ready solution.

APVE™ cylinders are a drop in, like for like replacement that can be easily connected to most existing low pressure systems. Even if initially installed as low pressure, APVE™ cylinders can be upgraded to mains pressure in the future.

APVE™ CAN REPLACE MOST EXISTING LP & MP CYLINDERS

LPCOPPER

LOW PRESSURE COPPER

Designed and manufactured to match copper cylinder sizing

LPVE

LOW PRESSURE VITREOUS ENAMEL

Drop in replacement with the same triple inlet options

APVE™

ALL PRESSURE™ VITREOUS ENAMEL

CHOOSE THE RIGHT APVE™

Select the existing low pressure cylinder below and find the correct APVE™ replacement.

What Sets APVE™ Apart

The All Pressure™ range is made using Rheem Ultramel®, which offers superior resistance to corrosion from chlorinated, hard, or bore water compared to copper or stainless steel.

With a 10-year warranty and 20+ products covering around 70% of low-pressure replacements, Rheem's APVE™ range makes it easy for plumbers and homeowners to upgrade performance without any additional complexity.

PRODUCT HIGHLIGHTS

- Height and diameter to match popular low-pressure copper sizes for easy and convenient direct replacement as a “like for like”
- Install as a mains pressure or as a medium/low-pressure and upgrade later with a valving change
- Bottom entry for direct replacement with low-pressure
- Suitable for a wide range of water conditions
- Superior durability compared to Stainless Steel and copper
- Double the tank warranty of Rheem copper cylinders

The All Pressure™ range features the exclusive **Rheem Ultramel®**, which is more durable than domestic grade enamels and can prolong the life of the water heater.

100% Electric for a More Sustainable Future

The Rheem APVE™ range is an all-electric, all-pressure solution designed to support New Zealand's energy future. Whether installed as a low-pressure system today or upgraded to mains pressure in the future, it delivers efficient hot water heating powered by electricity – around 80-85% of which is already generated from renewable sources in New Zealand. It's a smart, sustainable choice for modern Kiwi homes.
